PROFESSIONAL SUMMARY

Results-driven Microsoft Power Platform Developer with 2 year 6 months of experience designing, developing, and deploying enterprise-grade solutions using Power Apps, Power Automate, Power BI, and Power Virtual Agents. Proven track record of automating complex business processes, reducing manual effort by up to 70%, and delivering scalable low-code/no-code applications aligned with Microsoft 365 and Azure ecosystems. Certified Microsoft Power Platform Developer Associate with hands-on expertise in Dataverse, SharePoint, and Azure integrations.

CORE TECHNICAL SKILLS

Power Apps	Canvas Apps, Model-Driven Apps, PCF Controls, Component Libraries
Power Automate	Cloud Flows, Desktop Flows (RPA), Approval Workflows, HTTP Connectors, Custom Connectors
Power Pages	Web Portal Development, Web API Configuration
Dataverse	Tables, Relationships
Integrations	SharePoint, Teams, Dynamics 365, REST APIs
Languages	JavaScript, TypeScript, HTML/CSS, React.js, Node.js, SQL, JSON, Power Fx
Dev Tools	Azure DevOps, GitHub, Power Platform CLI

PROFESSIONAL EXPERIENCE

Power Platform Developer
Sonata Software Limited

June 2024 – Present
Bangalore, India

- Built AI-powered Obligation Management app integrating OpenAI via REST API to extract legal obligations from SOW/MSA contracts — reducing manual contract review by ~60%.
- Architected full Dataverse + D365 SCM integration pipeline for Warehouse Stock Take — connecting real-time product validation, stock count submission, and automated Counting Journal creation with zero manual re-entry.
- Engineered end-to-end India Tax Automation using Power Automate Desktop — automating GST/Income Tax portal logins across 5 entity credentials, eliminating 8+ hours of manual work per week.
- Designed Warehouse Stock Take Canvas App for HealtheCare with DataWedge barcode scanning on Android handheld devices, replacing manual paper-based stock counts across multiple sites.
- Developed role-based Infra Asset Numbering app backed by SQL Server with stored-procedure-driven Asset ID auto-generation and manager approval workflow with automated email notifications.
- Built back-office Model-Driven App for Warehouse Managers with variance reporting and inline editing; managed full UAT → Production environment lifecycle with role-based access via Power Platform Admin Center.

KEY PROJECTS

Warehouse Stock Take Scanning App | Client : HealtheCare

- Designed and developed a barcode-based Power Apps solution integrated with Dataverse, SharePoint, Power Automate, and Dynamics 365 SCM, enabling warehouse staff to perform mobile stock takes using Android handheld scanners. Implemented real-time inventory validation, Excel-based bulk imports, approval workflows, and automated counting journal creation, streamlining end-to-end inventory reconciliation across UAT and Production environments.

Infra Asset Numbering | Internal– Infrastructure Team

- Developed an enterprise asset management solution using Power Apps, Power Automate, SQL, and SharePoint to automate asset registration, approval workflows, Asset ID generation, audit tracking, and D365 data integration, enabling standardized lifecycle management and improved traceability of infrastructure assets across multiple locations.

Obligation Management System | Sonata Software Solutions Limited

- Built an AI-powered obligation management platform using Power Apps, Power Automate, SharePoint, REST APIs, and OpenAI integration to extract obligations from SOW and MSA documents, automate obligation tracking, provide role-based dashboards for cross-functional teams, and deliver proactive reminder notifications for improved compliance and governance.

India Tax Automation | Sonata Software Solutions Limited

- Automated the weekly tax litigation monitoring process using Power Automate Desktop, Power Automate Cloud, SharePoint, and Power Apps, enabling secure retrieval of tax portal documents across multiple entities, automated file comparison with historical records, exception reporting, stakeholder notifications, and centralized tracking through a Power Apps dashboard, significantly reducing manual effort and improving compliance visibility.

EDUCATION

B.E. in Computer Science and Engineering

Nandha Engineering College, Erode

2019 – 2023
CGPA: 8.8 / 10

CERTIFICATIONS

PL-400: Power Platform Developer Associate
